

Our Ref: UEQ3/FLGE/2018

Date: 5th August 2018

Dear Sir/Madam,

Lifting and hoisting inspection agencies approved by PDO

It has come to our knowledge that some lifting inspection agencies that are not approved by PDO have been:

- Conducting annual inspections of lifting equipment used in PDO's concession area;
- Issuing test/examination/inspection certificates with reference to PDO's Lifting and Hoisting Procedure PR-1708; and
- Misrepresenting to be authorized by PDO to conduct such inspections.

We wish to remind all contractors (involved in lifting equipment and/or lifting operations) to only use PDO approved lifting inspection agencies for the inspection and certification of lifting equipment. Non compliance may result in the breakdown or failure of equipment and result in serious HSE incidents.

The list of PDO approved of inspection agencies can be accessed from PDO's website at <http://pdointernet/hsems/Pages/LiftingHosting.aspx>. You can refer to this link from time to time to obtain an updated list. For any clarifications please contact PDO's lifting equipment (UEQ3) team and PDO's lifting engineers.

Please note that it is the responsibility of all contractors to ensure that inspection agencies used by them or their subcontractors are approved by PDO. Failing to adhere to such instruction may result in serious consequences, including termination of you business with PDO.

You are requested to circulate this message to your respective subcontractors as well. Your kind cooperation will be appreciated.

Thank you for your continuous support in ensuring a safe and accident free work environment.

Yours sincerely

Yours faithfully,
For Petroleum Development Oman L.L.C.
